Services Sector Dominance

Contributes over 50% to India's GDP.

Digital Economy Boom

885 million internet users in 2025.

Made with GAMMA

Infrastructure Revolution: Paving the Way for Growth

National Infrastructure Pipeline (NIP)	\$1.5 trillion by 2030
PM Gati Shakti Master Plan	\$100 billion for logistics
Road Network Expansion	65% in 10 years
Port Capacity Increase	79% since 2014

India is undergoing a significant infrastructure revolution. Massive investments are transforming transport and logistics. This facilitates unprecedented economic growth.

Digital & Logistics Backbone

World's Largest Digital Payments Market

UPI processed 140 billion transactions in 2024.

Rapid 5G Rollout

Over 400,000 5G base stations in 750 districts.

New Airports & Heliports

131 added since 2014, total 149 operational.

Dedicated Freight Corridors

Nearing completion, enhancing logistical efficiency.

Untapped Market Potential

Key Growth Sectors:

- FDI inflows: \$40 billion in FY2024-25.
- Green energy: \$250 billion target by 2030.

Emerging Markets:

- Electric Vehicles: 1.5 million EVs sold in 2024 (150% growth).
- Semiconductor manufacturing: \$10 billion incentive scheme.

India offers vast untapped market potential. Key sectors like green energy, EVs, and semiconductors are experiencing rapid expansion. This creates new investment and business opportunities.

The Indispensable Role of Consultancy

Guiding Market Entry

Navigating regulations for foreign firms.

Optimising Supply Chains
